- Via the OhioLINK database list: <http://www.ohiolink.edu/resources.cgi>

SPORTDiscus with Full Text

Search Tips:

Wildcard / Truncation: SPORTDiscus uses an asterisk (*) to replace an unlimited number of letters follow a word root and a question mark (?) to replace a single character inside a word.

Boolean Operators: SPORTDiscus uses: AND, OR, NOT

AND: Finds records that contain both words, although not necessarily in the same sentence or in the given order. AND ties the two concepts together and provides a more narrow search than just a single word alone.

OR: Finds records that contain either word or both words. Use OR for synonymous or related terms; this broadens the search.

NOT: Finds records that contain the first word and that do not contain the second word.

Proximity Operators: You can use a proximity search to search for two or more words that occur within a specified number of words (or fewer) of each other. The proximity operators are composed of a letter (**N** or **W**) and a **number** (to specify the number of words). The proximity operator is placed between the words that are to be searched, as follows:

Near Operator (N) - N5 finds the words if they are within *five words* of one another regardless of the order in which they appear.

Within Operator (W) - W8 finds the words if they are within *eight words* of one another and in the order in which you entered them.

Field Searching: The default fields for unqualified searches consist of the following: all authors, all subjects, all keywords, all title info (including source title) and all abstracts. Field specific searches may be performed on the following fields: All text, Author, Title, Subjects, Abstract, Source (Journal title), Company, Geographic Subject, or People mentioned in the article.

Limiting: Limit results by **date**, **publication type**, **publication name**, **peer-reviewed**, and more!

Locating Full Text: Many articles are readily available as either HTML (word-processed full text within the database) or PDF files (links to scanned images of the article). Articles without full text may link to full text with the "Find It" link.

OhioLINK's OLinks Linking Service: Click **FIND IT** to discover how to get a copy of the article:

- If the full text of a journal article is available online, FIND IT can connect you directly to it.
- If online full text is not available, check whether your library owns the journal in print or any other format.
- If this item is a book and is found at an OhioLINK library, you can determine whether your library owns it, or request it from another library.

Need Help?

- Stop by the library
